

I. Project Title

DeadlineDex: A Personal Assignment Deadline Tracker

II. Problem Statement

Students juggle multiple subjects, and each teacher often announces deadlines through different channels (Google Classroom, group chats, verbal reminders in class, or handwritten notes). Because there's no single place to see everything at once, students frequently forget or lose track of deadlines, leading to missed submissions, late passing, and lower grades. This problem affects students across all year levels, especially during exam weeks or when several projects overlap. Teachers are also affected indirectly, as they deal with more follow-ups and late submissions. Solving this helps students stay organized and reduces academic stress caused by forgotten requirements.

III. Project Objectives

1. Enable students to log at least 90% of their weekly assignments (subject, title, deadline, priority) into a single tracker within 5 minutes per session.
2. Reduce self-reported missed or late submissions by at least 50% over a one-month trial period compared to the student's usual method (memory, scattered notes, chat messages).
3. Provide a sorted view of upcoming deadlines (soonest first) that a student can check in under 10 seconds, tested with at least 10 sample entries.

IV. Planned Features

- Add a new assignment (subject, title, deadline, priority level)
- View all assignments sorted by nearest deadline
- Mark an assignment as "Done" or "Pending"
- Filter assignments by subject
- Simple reminder flag for assignments due within 2 days

V. Planned Inputs and Outputs

Inputs: subject name, assignment title, due date, priority (High/Medium/Low), status update (done/pending)

Outputs: sorted list of upcoming assignments, filtered list by subject, alert/flag for due-soon items, confirmation message when an entry is added or updated

VI. Logic Plan (Pseudocode)

START

DISPLAY menu: [1] Add Assignment [2] View All (sorted by deadline)

[3] Filter by Subject [4] Mark as Done [5] Exit

GET user choice

IF choice == 1:

 GET subject, title, due_date, priority

 SAVE assignment to list with status "Pending"

 DISPLAY confirmation message

IF choice == 2:

 SORT list by due_date (ascending)

 FOR each assignment in list:

 IF due_date is within 2 days:

 DISPLAY assignment with "DUE SOON" flag

 ELSE:

 DISPLAY assignment normally

IF choice == 3:

 GET subject name

 FOR each assignment in list:

 IF assignment.subject == subject name:

 DISPLAY assignment

IF choice == 4:

 GET assignment title

 FIND matching assignment in list

 SET status to "Done"

 DISPLAY confirmation

```
IF choice == 5:  
    END
```
